YAZAN HIJAZI

Automation Engineer | Business Process Automation | Systems Integration | BI Developer

Amman, Jordan | yazanbrc@gmail.com
yazanhijazi.vercel.app | linkedin.com/in/yaznhijazi | github.com/yaznhijazii

PROFESSIONAL SUMMARY

Automation Engineer with 2.8 years of experience in business process automation, workflow automation, and enterprise systems integration. Automated 60+ business processes in Bitrix24 for a 700-employee organization, integrated ERP, HR and internal systems, and built n8n workflows including an IVR system, a WhatsApp chatbot, and email-based approval automation. Designed KPI dashboards in Metabase and Power BI, and independently designed and built AI-powered platforms. Combines business analysis (requirements gathering, workflow design, documentation, testing) with hands-on engineering in n8n, Python and SQL.

CORE SKILLS

Automation & Integration: n8n, Bitrix24, ERP integration, HR system integration, workflow automation, business process automation, approval workflows, IVR, WhatsApp chatbots, CRM

Programming & AI: Python, SQL, AI tool development, AI-powered applications, data analysis, machine learning, NLP, ETL

BI & Analytics: Metabase, Power BI, Tableau, Excel, KPI dashboards, data visualization, reporting

Process & Delivery: Business process analysis, requirements gathering, workflow documentation, testing, system administration, user support, stakeholder meetings, team coordination, multitasking

Design Tools: Figma

PROFESSIONAL EXPERIENCE

Automation Engineer & BI Developer | 10/2024 – Present
Jo Academy | Amman, Jordan

- Business process automation: designed and automated 60+ end-to-end business processes in Bitrix24 (ERP/CRM platform) for a 700-employee organization.
- Customer-facing processes: customer service, customer experience, and sales and CRM.
- Internal processes: employee onboarding and offboarding, operations, purchase requests, content team, and design and production.
- System integration: integrated Bitrix24 ERP with the HR system and other internal tools, keeping data in sync across departments and reducing manual data entry.
- n8n IVR workflow: built an IVR (interactive voice response) workflow using n8n.
- n8n WhatsApp chatbot: built a WhatsApp chatbot workflow using n8n.
- Approval automation: built ERP-integrated n8n workflows that process approvals directly from email, driven by tickets in Bitrix24.
- BI and reporting: designed KPI dashboards and reports in Metabase and Power BI to support management decision-making.
- AI tools and internal systems: designed and built AI-powered tools and in-house platforms, including a 3D office management system, a team collaboration workspace, and an exam grading platform (see Projects).
- System administration: system administrator for a company of about 700 employees and the first point of contact for system issues and user support.
- Delivery: lead process discovery from start to finish, including stakeholder meetings, workflow mapping and documentation, testing and rollout.
- Team coordination: coordinate team members and manage multiple projects in parallel.

Data Analyst Intern | 07/2023 – 10/2023
SHAI for AI | Amman, Jordan

- Used Python and SQL for data analysis and ETL (extract, transform, load) processes to keep datasets accurate and reliable.
- Built interactive Power BI dashboards that combine multiple data sources, giving stakeholders a clear overview of key insights.

- Completed a final project: a global warming dashboard in Power BI.

PROJECTS

3D Office Management System — Workspace management synced with HR
- Interactive 3D system for managing offices and seats.
- Synced with the HR system so every seat and office is linked to its employee.
- Supports DWG (CAD) floor plan files.

Together — Company collaboration and project workspace
- Channels and rooms for team communication, plus chat.
- Shared calendars and task management.
- Bot assistant, notes, drawing board, and games in one platform.

Sullam — Exam grading platform
- Grades handwritten exams and generates full result reports.

Earlier Data Science Projects
- Customer Churn Prediction and Dashboard (01/2024 – 02/2024): machine learning churn prediction with a Power BI dashboard (graduation project).
- HR Dashboard Analysis (07/2024): tracked employee engagement and retention KPIs to support HR strategy.
- Flipkart Product Sentiment Analysis (01/2024): NLP sentiment analysis of product reviews using TextBlob and a Multinomial Naive Bayes model.

EDUCATION

Bachelor of Science in Data Science | 01/2020 – 02/2024
Al-Balqa' Applied University | Jordan
- Coursework: Python programming, machine learning, deep learning, statistical analysis, Tableau, KNIME.

CERTIFICATIONS

- IBM Data Science Professional (2023)
- Google Data Analysis Professional (2024)
- Stanford University Machine Learning Specialization (2024)
- HTUx Data Analytics and Business Intelligence Technology (2024)
- KNIME Analytics Platform, Basic Proficiency (2023)
